

**Your instruments..our sensors.  
The perfect pairing**

**piD-TECH<sup>®</sup> eVx**

**OEM Photoionization Sensors**

**Setting the Standard.....**

**Baseline<sup>®</sup>**  
a mocon company

Flexible • Versatile • 4P Platform • Intrinsically Safe

Indoor Air Quality

Industrial Hygiene & Safety Monitoring

Hazmat Sites & Spills

Confined Space Entry

Low Concentration Leak Detection

Soil Contamination & Remediation

The piD-TECH eVx saves considerable time and money in product research and development costs to implement photoionization detection into your products.

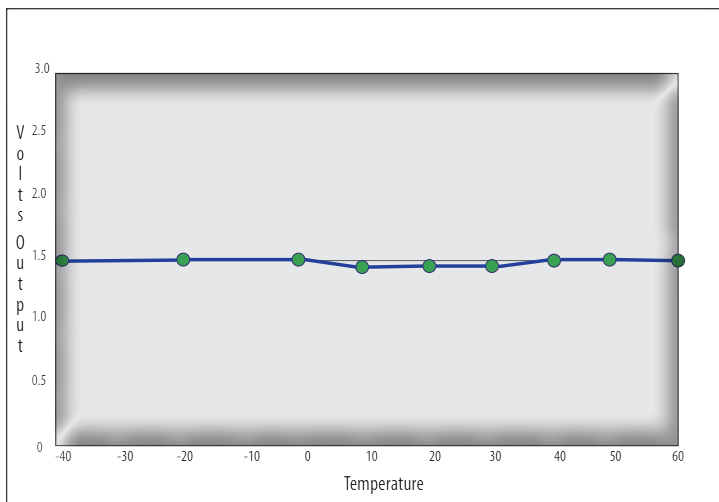

## Setting the Standard in Photoionization Detection Technology

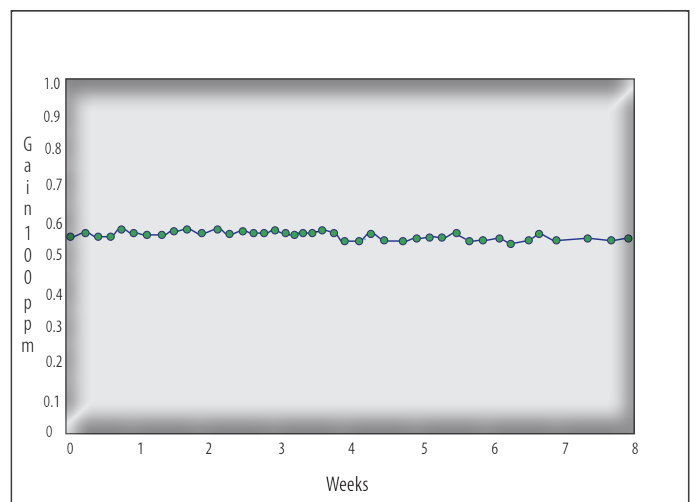

The piD-TECH® eVx plug-in sensor provides complete photoionization detection capabilities and is easily installed in portable and stationary gas monitors.

- Flat Temperature Response
- Flat Humidity Response
- MDQ range starts at 0.5 ppb
- Accurate over broad temperature operating range
- Unaffected by high or low humidity environments
- Provides excellent low end sensitivity

Accuracy does not change in high temperature and/or high humidity environments

Temperature Response

Humidity Response

- Maintenance and lamp cleaning are uncomplicated and can be done quickly, saving time and unnecessary efforts
- Operational and technical support are important, feel free to contact us with any questions you may have
- Ask about our out of warranty replacement program.

**Baseline's Service Department offers a variety of service plans**

- Start-up & training
- Preventative maintenance
- Phone & online support
- Warranty & extended warranty
- In house or onsite repair

**Contact us for more information regarding our service plans**
